

AJAY PRAJAPATI

Cybersecurity Enthusiast | Frontend Developer | IT Support | Tech Innovation Leader
+91-8369564372 | 64.ajayprajapati@gmail.com | linkedin.com/in/ajayprajapati | Mumbai, Maharashtra, India

PROFESSIONAL SUMMARY

Passionate Cybersecurity Enthusiast, Frontend Developer, and IT Support with a BSc Computer Science from Patkar Varde College (2023–2026, CGPA: 8.43). Author of 3 research papers on cybersecurity, including the Best Research Paper Award winner at International Conference CONFAB 2026. Proven leader with hands-on experience managing 19+ member teams, delivering 20+ public seminars, and reaching 1,000+ individuals through cybersecurity awareness campaigns. Skilled in Python, Flutter, Next.js, React Native, Firebase, and AI integration (Gemini API). Currently building hands-on SOC analyst skills through a self-built Wazuh SIEM home lab, with working knowledge of log collection, alert triage workflows, and endpoint monitoring. Foundational knowledge of networking concepts (OSI model, TCP/IP, DNS, DHCP, LAN/WAN) and IT support fundamentals including hardware troubleshooting, ticketing systems, and end-user assistance. Strong background in technical documentation, team leadership, and community-driven cybersecurity education.

CORE COMPETENCIES

Languages Python, C++, Java, Dart, JavaScript, TypeScript, HTML5, CSS3	Frameworks & Platforms Flutter, React Native, Next.js, Firebase, Supabase
Networking (L1 – Foundational) OSI Model, TCP/IP, DNS, DHCP, LAN/WAN, IP Addressing, Subnetting Basics, Wi-Fi Troubleshooting	IT Support Hardware & Software Troubleshooting, Help Desk Support, Ticketing Systems (concept), Remote Desktop Assistance, OS Installation (Windows/Linux)
Cybersecurity Phishing Detection, Social Engineering Awareness, Threat Analysis, Cybercrime Reporting, SIEM (Wazuh), Log Analysis, SOC L1 Workflows, Alert Triage	AI & Automation Gemini API, AI Chatbot Integration, Selenium
Tools & Productivity MS Office Suite, Technical Documentation, Git, VS Code	Soft Skills Team Leadership, Public Speaking, Mentoring, Reporting, Community Education

EDUCATION

BSc Computer Science | Patkar Varde College, Mumbai Jun 2023 – Mar 2026

- CGPA: 8.43 | Active research output and consistent academic performance
- Published 3 research papers on cybersecurity during undergraduate study

HSC (12th Grade) | Nirmal Junior College Jun 2023 | Grade: 67%

SSC (10th Grade) | S.V.N. English School Mar 2021 | Grade: 85%

NETWORKING & IT SUPPORT KNOWLEDGE

Networking Fundamentals (L1 – Beginner Level)

- Understanding of the OSI Model (7 layers) and TCP/IP protocol stack
- Knowledge of core network services: DNS, DHCP, HTTP/HTTPS, FTP, and SMTP
- Familiar with IP addressing (IPv4), subnetting basics, and default gateways
- Understanding of LAN, WAN, and Wi-Fi network topologies and how devices communicate
- Basic network troubleshooting: ping, traceroute, ipconfig/ifconfig, nslookup
- Awareness of network security concepts: firewalls, VPNs, and common attack vectors (applied in cybersecurity research)

IT Support Skills

- End-user hardware and software troubleshooting (desktops, laptops, peripherals)
- Operating system installation, configuration, and basic administration (Windows 10/11, Ubuntu Linux)
- User account management and access control (creating, modifying, and disabling accounts)
- Software installation, updates, patch management, and antivirus configuration

RESEARCH PUBLICATIONS

Cyber Safe Companion: A Comprehensive Mobile Application for Cybersecurity Awareness *CONFAB 2026*

and Education with Age-Based Threat Assessment | International Conference, Patkar Varde College

- Awarded Best Research Paper at International Conference CONFAB 2026, Patkar Varde College
- Presented a full-stack mobile cybersecurity education platform with AI-driven, age-based threat assessment
- Covered gamified learning modules, Gemini API chatbot integration, and multi-level user progression

Cybersecurity Beyond Tools: Unmasking the Psychological Manipulation *Research Paper 2025*

- Explored the human psychological dimensions of cyber threats including social engineering, phishing, and manipulation tactics
- Argued for awareness-first, behaviour-change approaches as the foundation of effective cybersecurity education

The Double-Edged Sword: AI-Powered Cyber Defense vs. AI-Enhanced Cyberattacks *Research Paper 2025*

- Analysed the dual role of artificial intelligence in both strengthening cyber defences and enabling sophisticated cyberattacks
- Discussed policy, ethical, and technical implications for organisations adopting AI-driven security frameworks

PROFESSIONAL EXPERIENCE

Frontend Developer | Commondo Protection Service *2025 (3 Months)*

- Designed and developed responsive web modules using Next.js, translating business requirements into performant, component-based frontend interfaces
- Replicated web modules into mobile screens using React Native, ensuring UI/UX consistency across platforms
- Maintained technical documentation for UI components and design decisions to support team handoffs
- Collaborated with the product team using Agile workflows, delivering pixel-accurate code within project timelines
- Supported internal IT processes by assisting team members with software setup, troubleshooting environment issues, and documenting development configurations

President – Cyber Warriors Club | Quick Heal Foundation Internship *Aug 2024 – Sep 2024*

- Led a 19-member team (3 officers + 16 Cyber Warriors), conducting weekly strategy meetings and setting quarterly outreach goals
- Established institutional partnerships with schools, NGOs, and industry stakeholders to extend program reach
- Delivered 20+ public seminars at schools and tech exhibitions, reaching 500+ community members on phishing, social engineering, and safe digital practices
- Authored session documentation, outreach reports, and meeting minutes to maintain operational continuity
- Mentored 16 Cyber Warriors in technical skills, networking awareness, and professional development — chapter awarded Best Entry College Award
- Nominated for Best President Award in recognition of leadership and measurable community impact

PROJECTS

Cyber Safe Companion – Cybersecurity Awareness & Education App

Flutter • Firebase • Gemini API

- Architected a full-stack mobile app with 7 modules: Cyber News, Quiz, Security Tips, Cybercrime Reporting, AI Chatbot, Psychology Support, and Password Checker
- Integrated Gemini API-powered chatbot for personalised, real-time cybersecurity guidance and age-based threat assessment
- Implemented multi-level learning progression (Beginner to Advanced) with gamified quizzes and progress tracking
- Produced full technical documentation including architecture diagrams, API integration notes, and module specifications

Wazuh SIEM Home Lab – L1 SOC Analyst Learning Environment

Wazuh • Ubuntu Linux • VirtualBox / VMware • Log Management • SIEM

- Built a personal home lab environment by deploying Wazuh (open-source SIEM & XDR platform) to simulate a real-world L1 SOC analyst workflow
- Completed full Wazuh server and agent setup on Ubuntu Linux virtual machines, configuring manager-agent communication and verifying log ingestion pipelines
- Gained foundational understanding of how security logs are collected, normalised, and forwarded to a centralised SIEM from endpoints
- Studied the SOC analyst workflow: alert triage, log correlation, event severity classification, and the escalation path from L1 to L2
- Explored Wazuh dashboard to monitor real-time agent status, review security events, and understand alert rule categories (authentication failures, file integrity, vulnerability detection)
- Actively progressing to hands-on threat scanning exercises including simulated brute-force detection, file integrity monitoring (FIM), and reviewing Wazuh built-in detection rules
- Documents lab setup, configurations, and findings as technical notes — reinforcing documentation skills aligned with SOC reporting standards

PhishShield – Advanced Phishing Detection Platform

JavaScript • HTML5 • CSS3

- Developed a real-time phishing URL detection system with educational modules, instant scanning, and detailed threat reporting
- Applied L1 networking knowledge (URL parsing, DNS lookups, HTTP header analysis) to identify malicious patterns

MalwareScanner Pro – File Security Analyser

Python • Tkinter

- Built a desktop GUI application for detecting and managing suspicious files with folder scanning and safe deletion protocols
- Simulates IT support-style file hygiene workflows used in endpoint security and helpdesk environments

ESSSQube – Event Management Company Website

Next.js • TypeScript | Live: essscube.vercel.app

- Built and deployed a production-grade event management website with responsive UI, modern navigation, and SEO-optimised architecture

RhythmFlow Academy – Dance Course E-Commerce Platform

Next.js • TypeScript • Supabase | Live: rhythmflowacademy.vercel.app

- Developed a full-stack course-selling platform with authentication flows, course catalogue, and Supabase-powered real-time backend

Ubuntu Fest 2025 – College Fest Website

Next.js • TypeScript | Live: ubuntu-fest2025.vercel.app

- Built a dynamic fest website with event listings, schedules, and registration flows using mobile-first, SEO-optimised design

ACHIEVEMENTS & AWARDS

- Best Research Paper Award – International Conference CONFAB 2026, Patkar Varde College (Cyber Safe Companion)
- Best Entry College Award – Quick Heal Cyber Warriors Program, presented by Hon. Governor of Maharashtra Shri C.P. Radhakrishnan
- Nominated for Best President Award – Quick Heal Cyber Warriors Club
- Essay Writing Competition Winner – Cosmos Jallos College Fest, Valia College (Jan 2025)
- Multiple Debate Competition Winner – MUN and inter-collegiate tournaments
- 14 inter-collegiate competition wins including 1st place in Tech Quiz, Treasure Hunt, Best CL, and Climax Writing

CERTIFICATIONS

Real Time Threat Detection and Management | Patkar Varde College (Autonomous) *Apr – Jun 2025*

- Erasmus+ Programme co-funded course covering threat detection methodologies, security incident response, and proactive threat management

Python for Cyber Security | Patkar Varde College (Empowered Autonomous) *Oct – Dec 2025*

- Erasmus+ Programme co-funded course on applying Python for scripting security tools, automating threat analysis, and building security applications

IMPACT & INNOVATION

- Reached 1,000+ individuals across educational institutions and communities through cybersecurity awareness campaigns
- Authored 3 research papers on cybersecurity topics including AI, psychology of cyber threats, and mobile education
- Delivered 20+ public seminars on cybersecurity with measurable knowledge improvement among attendees
- Mentored 16+ Cyber Warriors in technical skills, documentation, and professional development
- Deployed 4+ live production web and mobile applications with real-world users
